Visual Management Systems provides businesses with **Digital Video Surveillance, Recording and Remote Management Systems** for **loss prevention, physical security, asset protection and management controls**. As the manufacturer, VMS builds, installs and services DVR Systems, providing a wide range of solutions for all business types - from small to large – including manufacturing, wholesale, distribution, retail, restaurants, banks, hospitality and health care.

With numerous offices in the Northeast and covering the majority of the United States through our national network of dealers, VMS has highly trained, experienced and professional Loss Prevention Consultants, System Design Specialists, CCTV Installers and Technical Support Agents available to assist you with all aspects of system design, installation, support and service.

Through our financial partners, VMS offers flexible financial options for all types of businesses. There are a number of affordable purchase solutions including leasing, same-as-cash terms and flexible pay plans for seasonal businesses. Rollout discounts to multi-location businesses, as well as various promotions based on affiliations and recommendations are also available.

With VMS' DVR System you can secure your property, improve your bottom line profits and gain more peace of mind by implementing the powers of psychological deterrence, pro-active and reactive management as it applies to everyone associated with your business... employees, vendors, contractors, customers, tenants, guests and outsiders.

- **Deter and record criminal activity** such as loitering, shoplifting, property damage, burglary, robbery, violence, theft and fraud, which can account for 2 - 5% or more in net loss. Last year's National Fraud Examiner's Report to the Nation stated over \$660 Billion was stolen just by employee theft/fraud and is increasing by 15% per year. Vendor theft can account for 15% of losses. Only 1 out of 48 shoplifters get caught.
- **Monitor and enforce policies and procedures** for opening/closing, time clock entries, shipping/receiving, quality/quantity of work, inventory controls, transaction processing, customer service and "up" selling... ultimately improving individual accountability.
- **Address liability issues** such as worker's compensation, personal injury and other claims. You might receive a reduction in insurance premiums or prevent an increase or assessment by invalidating or minimizing false or overstated claims.
- **Take more time off** to do things that require your attention away from your business and to enjoy life.

VMS' DVR systems are built to stand the test of time supported by high quality components specifically designed to handle the requirements of digital video. VMS' user-friendly graphical user interface (GUI) offers you a simple yet effective solution. Whether you are in live mode or search mode, **just "point and click" to watch superior quality video in single or multi-camera-split views on a flat panel monitor right from your desk. You can playback video using the calendar and timeline to watch at various speeds from days, weeks or months. And, since each camera can be set to record on motion, you will easily recognize when you had activity or not - saving you countless hours of searching. Other features include image enhancement, print, save and back up - so you can burn still images or video clips to the built-in DVD-RW.**

Plus, with the Remote Client Software, you can access your DVR to watch live or recorded video from anywhere in the world using a PC, laptop or cellular device with a high-speed Internet connection.

VMS offers a variety of cameras and optional components such as box, dome, bullet, infrared, ID, license plate and covert cameras as well as deterrent spot monitors, cash register interfaces and audio monitoring and recording.

With VMS' Virtual Manager DVR System, they will think you could be watching anytime -- and you could!

Now, you will know... who, what, where, when and sometimes why!

Should you wish to discuss further, please feel free to call me at my office or cell number below.

I look forward to discussing your needs, demonstrating how our solution offers an excellent return on investment and why **VMS is your best choice for your loss prevention, business management and security concerns.**

Sincerely,

Gordon G. Gisser

Enabling Business Owners to Watch While They're Away!

Why Choose

...when there are hundreds of vendors selling "Digital" systems?

What makes us better?

Our Management Team

Visual Management Systems was founded and is operated by a team of experts with years of experience in the Digital Video Recorder industry. We have the experience of implementing thousands of systems serving our clients' best interests. Most other companies are alarm companies that sell cameras as an extra revenue stream, with little to no training or development.

Industry Research and Product Line

Visual Management Systems has spent years researching and developing the best, most stable product line in "DVRs" to avoid service issues. This is our core business. We are always working to improve and provide the best products in the industry. Many companies just install whatever equipment is available at the lowest price. Visual Management Systems uses the best possible equipment. We do not want "your new system" to be "your new headache".

Installation and Service

Visual Management Systems has the best service and installation team locally and nationwide. Since we specialize in this industry use the best equipment and have learned from our experience, we know how to make service quick and painless for our clients. From consultation to installation, training and service... you can be assured of great service, just ask to see some of the many testimonials we have received.

The Best Price

Visual Management Systems offers the best price value for the industry. We are not the least expensive or the most expensive. Just as you sell your products at a fair competitive market value, we understand the same principles and are priced to give you the best quality, the best service, and the best price

"You don't want to work with anyone else!"

VISUAL MANAGEMENT SYSTEMS

is proud to present some of our most prominent clients:
